

Pro Service Munich: health, marketing & logistic services for the Gulf Region

In the early nineties Munich became one of the favourite destinations for tourists from the GCC in Europe. Pro Service – established in 1982 – decided to focus on this business by offering its services to all major local hotels and VIP apartments for luggage transports. Throughout the years the name Pro Service became closely connected to luggage transports for arab tourists.

Helmut Gross and Victor André Fuchs

Today the company is serving tourists in all 5- and 4-star hotels and VIP apartments in Munich and the outer parts of the city. Furthermore Pro Service is also supporting the UAE consulate as a logistics partner, arranging transports to and from the UAE. With several Arabic speaking staff language barriers are not an issue for us!

A close partnership to several ground handling companies like Lufthansa Technik & Swissport gave way to expand the business into handling private aviation movements: By holding all needed licenses Pro Service is arranging the luggage transport from the hotel directly into the airplane on the roll field.

The whole service package is completed by a unique proposal: At Pro Service you can also get your Tax Refund made. Simply add the tax refund cheques to your luggage transport, and let Pro Service do the job. Uniquely as well are the office hours: 24 hours seven days a week. Under the number +49 (0)171 823 3051 you may always reach your Pro Service partner to support you in your needs.

The specialization into logistics services for the middle east does of course not only refer to luggage transports: today Pro Service is offering its services to various fields of the german industry, transporting pharmaceuticals, spare parts, machinery, exhibition goods, etc. into any arab country. Apart from the logistics services today the Marketing division is showing various shopping opportunities in the blue "arab tourism brochure" to arab tourists. The separate division "Golden Health", offering various health services for arab patients coming to Central Europe for medical treatment. Golden Health is an intermediary system of doctors, professors, clinics and hospitals in Germany, Austria & Switzerland, represented in a common reference book. All participants are specialized on medical treatments of Arabian patients and are very well familiar with the Arabian health tourism in Europe. Many of them are even holding working permits e.g. for the UAE to offer the service of "visiting doctor" for treatments abroad in the GCC.

As an amendment to our health activities they are easing the patient's stay in Europe by offering Transportation services from airport to place of medical treatment, Translation services, Hotel arrangements and of course: any other necessary arrangements the patient or his family is in need of.
